

## Dramatic Skies: Cloud Sprites 1.0 READ ME

Thank you for purchasing this sprite pack. The folder structure and naming patterns should make it easy to navigate. If you find any problems or would like to suggest improvements you can use one of the contact options below.

There are 3 demo scenes that I created to show off what you can do with the asset. You can find them directly in the "DramaticSkies\_CloudSprites" folder. There is one scene for day, night and sunset.

If you are interested in more content similar to this package I have a skybox collection matching the style of these sprites. Here is a link to the asset store listing: [Dramatic Skies: Skybox Collection](#)
